Global search function

You can search for a word in multiple contents/dictionaries.

Enter a word into the “読み” (Japanese reading) or “spelling” fields to search within the target dictionary.

As you type, the candidates for matching narrow (filter search). If there are still many candidates after entering the whole word, you can switch to “exact search” to browse only the exact word you wish to have defined.

Example: Global search for the word “advantage.”

- 1 Press **一括検索**.

The global search entry screen appears.
Select the text field according the entry character type by using **▼** or **▲**.

- 2 Press **▼** and enter “advantage” in the “spelling” field.

As you type, the candidates for matching narrow.

- 3 Press **切替** to search for words that match your entry exactly.

The list of words corresponding to your entry appears.

To change the entry, press **切替** to return to the filter search screen and enter again.

- 4 Select the desired word using **▼** or **▲** and press **検索/決定**.

The details screen of the word appears along with its definitions.

- To return to the previous screen, press **戻る**.

Preview display function

If many candidates are listed for a word and it is difficult to decide which word is the correct one, the preview display will help you by providing a brief note about each word.

Each time you press **機能切替** “プレビュー” (preview) while candidates are listed, the preview display will be shown on the right, turned off, or shown on the bottom in this order.
(The preview display is turned off in this screen example.)
